

See how Aflac can help improve your benefits package

Open Enrollment will Close on Friday, August 28, 2026

Aflac for OPERATING ENGINEERS Local 12

Health insurance wasn't designed to cover everything. That's why there's Aflac. We can help take care of what health insurance doesn't cover. And with healthcare costs on the rise, more employees than ever are seeking an extra financial safety net for unexpected medical expenses.

Supplemental insurance plans

Group Disability

What if you couldn't work due to an injury or illness? Group Disability insurance helps protect your income in the event that you are unable to work.

Group Accident

Group Accident insurance can help with unexpected expenses associated with an accidental injury, so you can focus on getting better.

Group Critical Illness

Group Critical Illness insurance helps pay the expected and unexpected expenses that arise from diagnosis of a covered critical illness.

Group Hospital Indemnity

Health insurance isn't meant to cover all expenses associated with hospitalization – like deductibles and copays. Group Hospital Indemnity insurance can help minimize those out-of-pocket costs so you can focus on recovery.
